**Other skills**

mechanics: I am a car / motorbike enthusiast, I document myself on various models, I know many things about engines, among other things, I also enjoy doing some mechanical work alone.

audio: I am also a big fan of music, listening you can say anything, and from here the passion for hi-fi systems was born both for home and obviously for cars, even here I sometimes do some work alone. I document a lot about the various components to be used in this sector, such as amplifiers, speakers, headphones etc.

Technological: I really like technology, especially PCs, smartphones and photography, on which I document a lot, in fact I often advise many friends on what to buy with a certain budget. Sometimes I even arrange some smartphones.

**Driving licence**
