ABOUT ME

My name is Giovanni and I am a fifth-year student at "Archimede" Technical Institute in Catania. I have always had a strong passion for learning and cultural growth, and I have worked hard to acquire knowledge and skills during my high school years.

I am motivated and determined to put into practice what I have learned so far and to gain work experiences that allow me to further develop. My strong motivation allows me to look confidently towards the future, especially in the professional field.

I am able to quickly integrate into work groups, both academically and socially, thanks to my good communication skills, active listening ability, and predisposition to teamwork. I also have a consolidated attitude to approach reality in a positive and proactive way, which allows me to face challenges with a constructive perspective.

I am convinced that my commitment and dedication can lead me to achieve my goals and contribute to the success of the organizations I will work for in the future. Therefore, I am looking for opportunities that allow me to put my knowledge and skills into practice and to further grow professionally.

HOBBIES AND INTERESTS

Boxing, tech and motorsports

I am a competitive boxing enthusiast and have competed in various competitions in recent years. This sport has taught me discipline, determination, and perseverance, qualities that I consider important in the world of work as well.

In addition to boxing, I also have a great passion for motorsports, computer science, and technology in general.
